Psychology Professor – Faculty of Science and Technology
ومن نتائج الدراسة: شعور الطالبة المغتربة بالوحدة النفسية كان أكبر من شعور الطالب، كذلك لا يؤثر إحساس الطالب المغترب بالوحدة النفسية (متوسط) على دافعيته للإنجاز وتحصيله الدراسـي بينما يؤثر إحساس الطالبة المغتربة بالوحدة النفسية على دافعيتها نحو الإنجاز الأكاديمي ومستواها التحصيلي بالسـلب.
Abstract:
This research aims at determining the difference in the level of psychological loneliness between male and female expatriate students studying in Egyptian universities, and revealing the extent of the influence of psychological loneliness feelings towards academic achievement, as well as its effect on motivating students to study. The sample consisted of some students of some Private universities in 6th of October City, Specifically Faculty of Engineering - the first year. The students are from Gulf countries (Saudi Arabia - Kuwait - Qatar ... etc); With the aim of avoiding the impact of cultural differences between male and female students. This study is applied on a sample of (50) male students and (50) female students using some measures such as: psychological loneliness Scale; Achievement Motivation Scale; Male and female students' grades. The results of the study illustrate that: The expatriate female student's feeling of psychological loneliness was greater than that of the male student. Likewise, the emigrant male student's feelings of psychological loneliness, which was (average) does not affect his motivation for academic achievement. While on the contrast, the expatriate female student's feeling of psychological loneliness has a negative effect on motivation towards academic achievement.
